Proposal Pitch Assignment
Spring 2005

For the next class period, I would like you to write a brief pitch (approximately 200-250 words) for a potential proposal topic. Topics should involve a change to the Purdue campus you would like to see instituted. This topic can be recycled from one of the those rejected during the public document.

This pitch, which can be written in the form of a couple of paragraphs or in list of bullet points of 3-5 sentences each, should answer the questions I've listed below.

- What is the campus problem that you want to address?
- What communities are affected by this problem?
- Why is this problem important?
- Is this topic manageable for this assignment?
- How can this topic be researched? What library sources are available about this topic?
